

Hirdesh Kalmodiya

Indore, Madhya Pradesh, India – +91-8236055268 – kalmodiyahirdesh@gmail.com – LinkedIn – GitHub – LeetCode

Professional Summary

Software Engineer and Full Stack Developer (MERN Stack) with hands-on internship experience building scalable web applications, REST APIs, and backend systems. Strong foundation in Data Structures and Algorithms (DSA), Object-Oriented Programming (OOP), System Design, and DBMS. Maintains an 8.7 CGPA and has solved 412+ problems on LeetCode. Experienced in Agile development, authentication systems, and Generative AI application development (LLMs, RAG, AI Agents). Seeking Software Development Engineer (SDE) / Software Engineer Intern roles.

Technical Skills

- **Programming Languages:** C++, Java, JavaScript, Python, SQL
- **Frontend Development:** React.js, HTML, CSS, Tailwind CSS, EJS
- **Backend Development & Databases:** Node.js, Express.js, MongoDB, MySQL, REST APIs, JWT Authentication
- **Generative AI:** LangChain, LangGraph, RAG, AI Agents, LLMs
- **Tools & Platforms:** Git, GitHub, Docker, AWS, Postman, VS Code, CI/CD
- **CS Fundamentals:** DSA, OOP, DBMS, Operating Systems, Computer Networks, System Design

Work Experience

Full Stack Developer Intern – May 2025 to July 2025

Snayvik Tech Labs Pvt. Ltd., Indore, Madhya Pradesh

- Engineered and shipped production-ready React.js components and RESTful API integrations, improving application performance through reusable component architecture and efficient state management.
- Developed backend modules in Node.js and Express.js with MongoDB; built JWT-based authentication and role-based access control adopted across the platform.
- Diagnosed and resolved critical bugs in a live production codebase through systematic debugging, collaborating in Agile sprints with daily stand-ups and code reviews.

Projects

PrepAI – AI Placement Preparation Platform – June 2026 – Jul 2026

Technologies: React.js, TypeScript, Node.js, Express.js, MongoDB, LLMs

- Built a full-stack AI-powered placement preparation platform featuring LeetCode analytics, an AI Interview Coach, and an AI Placement Coach.
- Engineered multi-agent AI mentors with conversation memory, automated interview generation and evaluation, JWT authentication, and MongoDB caching to reduce LLM API usage.

AI Document Chat Assistant – nov 2025 – dec 2025

Technologies: Python, LangChain, LangGraph, ChromaDB, Streamlit, Gemini, Groq

- Developed a RAG-based chatbot for PDF question answering using semantic search and vector retrieval.
- Implemented AI agents, conversation memory, tool calling, and real-time streaming responses using LangGraph.

StudyMate – Aptitude Preparation Platform (Live Demo) – July 2025 – Sep 2025

Technologies: React.js, Node.js, Express.js, MongoDB

- Built a full-stack aptitude platform with 500+ MCQs, JWT authentication, analytics, and leaderboard tracking.
- Designed REST APIs and optimized MongoDB queries for fast, scalable performance.

WhatsApp Chat Clone – nov 2024 – dec 2024

Technologies: React.js, Node.js, Socket.io, MongoDB

- Built a real-time messaging application with Socket.io, JWT authentication, and MongoDB chat storage.

Education

B.Tech, Computer Science Engineering – 2023 to 2027

Institute of Engineering & Science, IPS Academy, Indore, Madhya Pradesh CGPA: 8.7 / 10.0

Class XII (PCM) – 2023

Rose Mary Higher Secondary School, Bhopal, Madhya Pradesh Percentage: 76%

Certifications

- **DSA Training** – Spoken Tutorial Project, IIT Bombay (Dec 2024); Score: 87.50%, Credits: 4
- **Google Cloud Skills Boost** – Hands-on labs in Agentic AI, BigQuery Agents, Gemini Agent Evaluation, and AI Data Cloud (2026)
- **Code Vipassana Season 15** – Completed Agentic AI and Google Cloud GenAI hands-on labs (2026)

Achievements

- **412+ LeetCode Problems Solved:** Solved problems across Arrays, Strings, Linked Lists, Trees, Graphs, Dynamic Programming, Greedy Algorithms, and Binary Search.
- **Global Rank 3872 – TCS CodeVita™ Season XIII**
